

PathReportEval: A Systematic Benchmark for Pathology Report Generation

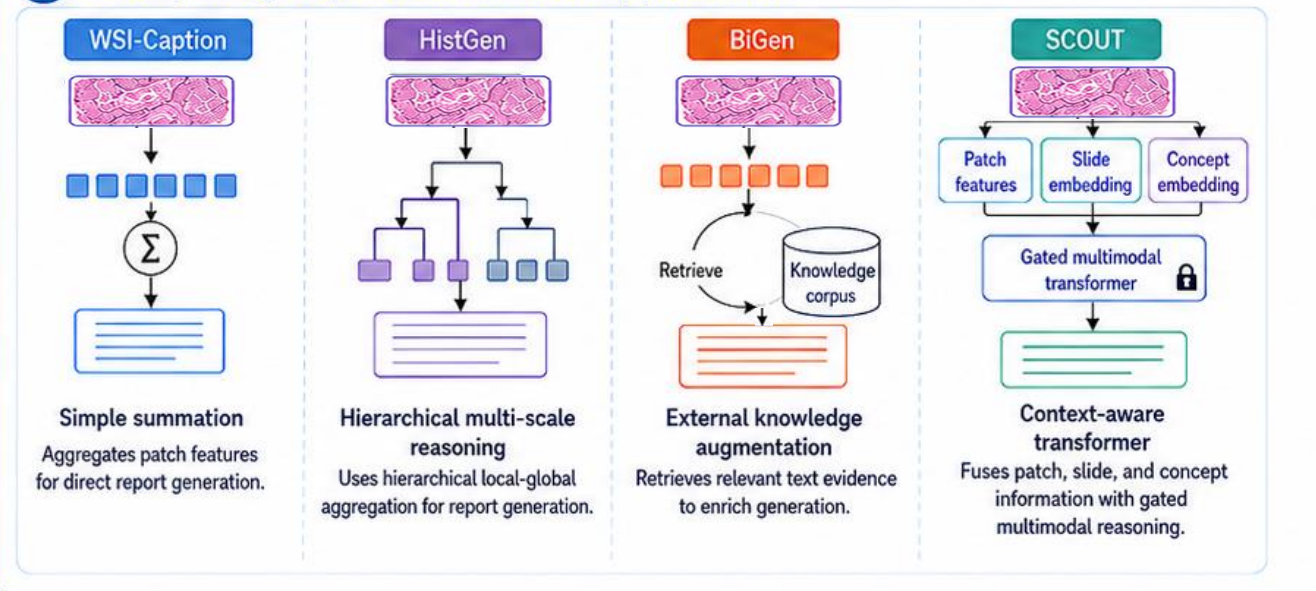

1. Diverse Datasets

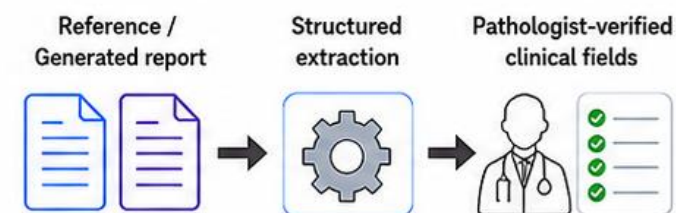

2. Foundation Visual Encoder

3. Comparing Report Generation Approaches

4. Clinical Report Quality Score (CRQS)

CRQS Components

Clinical Fact Coverage (CFC)

Proportion of clinically relevant facts in the reference report that are correctly generated.

Key Information Recall (KIR)

Recall of essential clinical information items (e.g., diagnosis, grade, stage, margins).

Hallucination Rate (HR)

Proportion of generated statements that are factually unsupported or contradicted.

Clinical Discordance Score (CDS)

Severity-weighted discordance between generated and reference clinical findings.

Evaluated alongside BLEU, ROUGE, and METEOR

CRQS captures clinically meaningful errors missed by lexical metrics.
